

NICE S. ECALNER

GAME DEVELOPER & PROGRAMMER

Email: niceecalner05@gmail.com | Location: Poblacion Lupi, Camarines Sur, Philippines

PROFESSIONAL SUMMARY

Dedicated and innovative Game Developer with a strong foundation in gameplay programming, level design, and 2D/3D game mechanics. Experienced in rapid prototyping, system architecture, and developing engaging interactive experiences using Unity, C#, and C++. Proven ability to collaborate in agile environments, solve complex technical challenges, optimize game performance, and deliver polished gameplay features from concept to execution.

CORE COMPETENCIES

Game Development

- Gameplay & Systems Programming
- Level Design & Environment Building
- Rapid Prototyping & Iteration
- UI/UX Design for Games
- Version Control (Git) & Agile Workflow

Languages & Frameworks

- C#
- C++
- Java
- Object-Oriented Programming (OOP)

Tools & Software

- Unity 3D / 2D Engine
- Blender (3D Modeling)
- Adobe Photoshop
- Visual Studio / Code Editors

GAME DEVELOPMENT EXPERIENCE

Gameplay Programmer & Designer
Independent & Collaborative Projects

- Engineered core gameplay systems, player controllers, and interactive mechanics leveraging robust C# and C++ architectures within the Unity Engine.
- Developed and successfully deployed multiple small-scale games and functional prototypes, focusing on performance optimization and clean code practices.
- Designed and implemented comprehensive UI/UX flows, enhancing player retention, accessibility, and overall game feel.
- Collaborated in cross-functional team environments to integrate level design, 3D character models, and audio elements into cohesive interactive experiences.
- Managed project repositories using Git for version control, facilitating seamless team collaboration, branch management, and debugging workflows.

- Created and optimized 2D and 3D game assets using Blender and Photoshop, ensuring high visual fidelity while adhering to strict engine constraints.
- Applied advanced game theory and storytelling techniques to structure engaging narrative loops and responsive environments.

EDUCATION

Bicol State College of Applied Sciences and Technology
Advanced Coursework in Game Development, Programming & Interactive Media

King Thomas Learning Academy
Information Technology Preparatory Studies
